

JOE AL SOKHEN

JUNIOR SOFTWARE ENGINEER | FULL-STACK & BACKEND

Beirut, Lebanon | joe.alsokhen@gmail.com | [linkedin.com/in/joesokhen](https://www.linkedin.com/in/joesokhen) | [Portfolio](#)

Professional Summary

Recent Computer Science graduate with internship experience developing full-stack applications, backend APIs, workflow automation, and database-driven systems. Built software using ASP.NET Core, Django, Python, React/Ionic, React Native, Flutter, and SQL databases. Experienced in API integration, authentication, real-time communication, debugging, and Linux deployment, with a strong interest in financial technology and reliable transaction-oriented systems.

Technical Skills

- **Programming:** Python, C#, JavaScript, TypeScript, Java, Dart, Swift, C++
- **Backend:** ASP.NET Core, Django, Django REST Framework, REST APIs, Entity Framework Core, WebSockets, Celery, JWT authentication
- **Frontend & Mobile:** React, Ionic, React Native, Expo, Flutter, SwiftUI, HTML, CSS
- **Data:** PostgreSQL, Microsoft SQL Server, SQLite, Redis; relational data modeling and normalization
- **Cloud & Deployment:** AWS EC2, Ubuntu Linux, Gunicorn, Nginx, systemd, HTTPS, Route 53, UFW
- **Tools:** Git, Postman, Visual Studio Code, Xcode, Android Studio

Education

Bachelor of Science in Computer Science

American University of Science and Technology (AUST)

June 2026
Beirut, Lebanon

Professional Experience

Full-Stack Developer Intern

Holcom Group

June 2025 – July 2025

Beirut, Lebanon

- Contributed to a full-stack field operations platform supporting customers, visits, journeys, tasks, transactions, service types, and user activity workflows.
- Developed ASP.NET Core REST API features using Entity Framework Core, JWT authentication, and Microsoft SQL Server.
- Built and refined React, Ionic, and TypeScript workflows for administrative and field-operation users.
- Implemented and debugged completed, on-hold, and postponed task states, validating API behavior and database persistence across the application.

Software Developer Intern

Liban Fruits

July 2024 – November 2024

Beirut, Lebanon

- Developed a Python automation tool that extracted product codes from high-volume Toters and NOKNOK orders and entered them into internal systems.
- Reduced repetitive manual data entry and improved order-processing accuracy for large, multi-item orders.
- Supported daily invoice preparation and order verification to help ensure accurate dispatch operations.

Data Intelligence Intern

Lebanese Army

August 2023 – October 2023

Beirut, Lebanon

- Analyzed operational communication data and prepared insights supporting internal decision-making.
- Maintained confidential personnel records for more than 700 staff members with accuracy and controlled handling.

Selected Projects

Personal Finance Tracker, Finance Management System

Django, Python, SQLite, JavaScript, AWS EC2, Ubuntu, Gunicorn, Nginx

- Built a finance application supporting transactions, budgets, custom categories, validation, and recurring financial records.
- Designed recurring-transaction workflows including single-occurrence changes, series deletion, and date and recurrence validation.
- Deployed the application on AWS EC2 using Gunicorn, Nginx, systemd, Route 53, HTTPS, firewall rules, and restricted SSH access.

L2Ita, Listings and Auctions Platform

Django REST Framework, React Native, Expo, Redis, Celery, WebSockets

- Developed marketplace workflows for fixed-price listings, auctions, bids, watchlists, comments, profiles, and authenticated users.
- Implemented JWT authentication, image uploads, filtering, pagination, rate limiting, access controls, asynchronous verification, and WebSocket notifications.

ForenSight, AI-Powered Bloodstain Pattern Analysis | Graduation Project

Flutter, Dart, TensorFlow Lite, Vertex AI AutoML / Edge, Python, Computer Vision

- Built a forensic decision-support application using an image-classification model covering primary bloodstain classes and seven subclasses with close collaboration with the forensics department.
- Achieved 96.65% precision and a 0.933 Macro F1 score on unseen test data, with on-device inference completed in under one second.

Certifications

- CS50W: Web Programming with Python and JavaScript — HarvardX (edX), October 2024
- Introduction to Cybersecurity — Cisco, February 2024
- Operating System Basics — Cisco, February 2024
- Information Technology Specialist in Python — Microsoft, January 2024
