

JOE AL SOKHEN

SOFTWARE ENGINEER | FULL-STACK DEVELOPER

Beirut, Lebanon | joe.alsokhen@gmail.com
Portfolio: joesokhen.github.io | Additional projects: l2ita.com | LinkedIn: linkedin.com/in/joesokhen

Computer Science graduate with full-stack development and Python automation experience. Built React/Ionic, ASP.NET Core and Django applications, with performance optimization, real-time messaging and AWS deployment.

EDUCATION

Bachelor of Science in Computer Science June 2026
American University of Science and Technology (AUST) | Beirut, Lebanon

RELEVANT EXPERIENCE

Holcom Group | Beirut, Lebanon June 2025 – July 2025
Full-Stack Developer Intern

- Built a field-operations application with React, Ionic and TypeScript, backed by ASP.NET Core APIs, Entity Framework Core, JWT authentication and SQL Server.
- Improved launch performance beyond initial delivery:** profiled loading with Chrome DevTools, optimized assets, applied React memoization and deferred computations until needed.
- Reduced API payloads to fields needed by each view or action, avoiding unnecessary data transfer.
- Refined web and mobile UI/UX**, adapting layouts and interactions to each platform.
- Validated login, authentication and CRUD workflows end to end; inspected database tables to confirm saved values and resolve interface/API discrepancies.

Liban Fruits | Beirut, Lebanon July 2024 – November 2024
Operations Associate

- Independently built Python/pandas automation for Toters and NOKNOK orders, cutting order-preparation time by an **estimated 50–67%** versus manual processing.
- Prevented manual item-code and quantity entry mistakes through automated matching and conversion.
- Adopted for near-daily use across multiple branches**, with unmatched order items flagged for review.

TECHNICAL SKILLS

Languages: Python, C#, SQL, JavaScript, TypeScript
Frontend: React, Ionic, React Native, Expo, HTML, CSS
Backend: ASP.NET Core, EF Core, Django REST Framework, Django Channels, JWT, Celery
Data & tools: SQL Server, PostgreSQL, SQLite, Redis, pandas, Git, Postman, Chrome DevTools, AWS EC2, Linux

SELECTED PROJECTS

WoCheck | Healthcare Networking and Consultation

Personal project | React Native, Django REST Framework, PostgreSQL, Redis

- Built consultation-request and chat interfaces backed by Django APIs, with real-time text/image messaging and delivery/read states.
- Implemented consultation rules and permissions, with API tests for unauthorized access and invalid transitions.

L2ita | Listings and Auctions Application

Personal project | React Native, Django REST Framework, Celery, JWT

- Built listing screens with image galleries and loading/error states, backed by listing, auction and watchlist APIs.
- Implemented bidding and expiry checks, verified-owner permissions, account verification and password recovery; queued verification emails through Celery.

Personal Finance Tracker | AWS Deployment and Security

Academic project | Django, SQLite, JavaScript, AWS EC2

- Built budget and transaction workflows with date validation and recurring-transaction editing/deletion.
- Deployed with Gunicorn, Nginx, systemd, Route 53 and HTTPS; configured security headers, firewall rules and restricted SSH access, and ran ZAP/Nikto scans.

Training: CS50W: Web Programming with Python and JavaScript | HarvardX (edX), Oct 2024

Languages: Arabic (native) | English (fluent) | French (intermediate)
